PROFILE

Game Developer specializing in gameplay programming, AI systems, and UI/UX architecture with experience across Unity (C#) and Unreal Engine (C++/Blueprints). Backed by 16 years of professional Mechanical Engineering experience. Adept at building core player systems, enemy behaviors, environmental mechanics, and resource/progression frameworks.

GAME DEVELOPMENT ·
ACADEMIC

APR 2026 - PRESENT

Team Nebula Interactive · Full Sail
University

Action Adventure RPG

Unreal Engine

UI/UX & AI Lead

- Designed and implemented HUD and UI systems including menus, quest logs, and interaction displays

EDUCATION

Full Sail University · Winter Park, FL
JUN 2026

- Designed and implemented enemy AI behaviors for escalating combat encounters
- Created horror event logic tied to exploration, tension, and player decision-making
- Implemented 'monster house' trigger systems for ambushes and scripted encounters
- Developed gameplay and systems using Unreal Engine (C++ & Blueprints)

JUN 2025

Team Clockwork · Full Sail University

First Person Shooter

Unity (C#)

Gameplay & AI Systems

- Implemented core FPS player systems: movement, crouch/hide, shooting, and pause functionality
- Created enemy AI for Clockwork Rifleman and Detonator Wraith with multiple difficulty tiers
- Designed environmental hazards: frozen terrain, snowy surfaces, collapsing structures
- Implemented XP-based progression and energy cell resource systems

OCT 2025

Green Team · Full Sail University

Puzzle Game

C++ / Vulkan

Core Gameplay Systems

- Implemented core virus mechanics including placement, color

Cameron University · Lawton, OK
MAY 2008

Cameron University · Lawton, OK
MAY 2006

CERTIFICATIONS

 SolidWorks Certified Professional – Core

 SolidWorks CP – Advanced Sheet Metal

 SolidWorks CP – Advanced Weldments

 SolidWorks PDM Certification

assignment, and visual/audio feedback

- Built combo detection system supporting match-four logic and cascading reactions
- Finalized save/load system with reliable state persistence and error handling

ENGINEERING EXPERIENCE —

Barrett Trailers

SEP 2021 - PRESENT · Purcell, OK

- Designed and modified parts across manufacturing, trailer, and stock trailer equipment departments

Evolve / Tesla

APR 2020 - SEP 2021 · Remote

- Delivered engineering solutions that improved safety, reduced costs, and streamlined assembly

Urban Farmhouse Designs

JAN 2015 - SEP 2020 · Oklahoma City, OK

- Led engineering department producing drawings and parts for all company product lines

Titan Tanks & Vessels

**MAR 2009 - JAN 2015 · Elmore City,
OK**

- Managed designers and drafters;
oversaw ASME code and non-code tank
and vessel design
